Disney+ Streaming | HyperGiant via salsaMobi July 2021 - October 2021 100% Remote
Roku Developer
- Daily use google suite, zoom, slack, jira, github, vscode, iTerm, brightscript
- Increased unit test coverage by 60% supporting SRE (Software Reliability Engineer)
- Created a snippets library to use with proprietary testing framework
- Created a python script to report test coverage progress

Discovery Education | SURGE IT 2020-2021 10/2020-04/2021 100& Remote
Software Engineer | Vuejs Developer
- Used JIRA, github, slack, chrome, Visual Studio Code, Photoshop, javascript, css, sass.
- Participated in all agile ceremonies, planning, sprints, syncs, demos, cross team sessions, and retros.
- Supported vuejs development, value and prioritization with an agile product team.
- Sprint task assignments included, bug fixes, improvements and analysis.
- Assisted in application localization, internalization and accessibility.

Los Alamos National Laboratory | COMPA 10/2019-04/2020
Web Developer
- Used Gitlab, jira, PHPStorm, Pycharm, Visual Studio Code, SOLR, docker, Photoshop, PHP, javascript, sass, React, Vue, html.
- Assisted in Development for 3 research library teams.
- Supported PHP application for Scientific document submission search and retrieval for the RASSTI team.
- Created prototypes and proofs of concepts for a modern application to migrate RASSTI.
- Created a chrome extension for peer review status of scientific documents for the prototype team.
- Supported Ruby on Rails application using Black Light framework for scientific document search.
- Created a python script to aid advanced weapon systems metadata/schema tagging.

Indian Health Services | Wichita Tribal Enterprises 2018
Front End Developer | Full Stack Developer
- Created websites with cms using vuejs, Photoshop, mongodb and PHP.
- Designed and developed web sites to be integrated into a mura cms that met requirements.
- Maintained web accessibility standards for websites and documents.

Sandia National Laboratory | SAIC 2017
Front End Developer
- Used Rally, gitlab, angularjs, javascript, css, cytoscape, D3.
- Participated in all agile ceremonies, planning, sprints, demos and retros.
- Supported multiple AngularJs applications for co-author network and search result applications for the Advanced Knowledge Systems department.
- Added support to test search results using different machine learning algorithms.

hulu | Globant 08/2015-04/2016
Front End Developer
- Used jira, github, javascript, python, sass, ruby, backbone, react, redux
- Participated in all agile ceremonies, planning, sprints, demos and retros.
- Integrated optimizely into development and qa environments.
- Assisted with features, bug fixes, enhancements for mobile and web application
- Assisted with a python rewrite application using cherrypy and nose

Certificates
- UCSC extensions Multimedia Production and Design 2001
- OREILLY School of Technology PHP & MySQL 2005
- UCLA extensions User Experience 2007
